MATERIALS SCIENCE AND ENGINEERING A VOLUME 188, NUMBERS 1–2, NOVEMBER 30, 1994

Contents

INVITED REVIEW

A review of crack closure, fatigue crack threshold and related phenomena 1
A. K. Vasudevan (Arlington, VA, USA), K. Sadananda (Washington, DC, USA) and N. Louat (Alexandria, VA, USA)

Orientation dependence of cyclic deformation in high purity titanium single crystals 23
H. Gu, H. Guo, S. Chang (Shaanxi, People's Republic of China) and C. Laird (Philadelphia, PA, USA)

New micromechanism for strengthening in polycrystalline solids 37
I. A. Ovid'ko (St. Petersburg, Russian Federation)

Effects of hydrogen on thermally activated dislocation motion in iron. 43
H. Dong and A. W. Thompson (Pittsburgh, PA, USA)

Residual stress in and around rivets in clad aluminum alloy plates. 51
T. J. Fitzgerald and J. B. Cohen (Evanston, IL, USA)

The effect of impurities on ductility and cavitation in the superplastic Zn–22%Al alloy 59
K.-T. Park, S. T. Yang, J. C. Earthman and F. A. Mohamed (Irvine, CA, USA)

A theory of dipolar dislocation wall structures 69
M. Saxlová and J. Kratochvíl (Prague, Czech Republic)

Solid state extrusion as a mechanical test method 81
J. R. Dryden, D. M. Shinozaki, A. S. Deakin and A. Klauzner (London, Ont., Canada)

The effects of electrodischarge machining on fracture strength and surface microstructure of Al_2O_3–Cr_3C_2 composite 91
C. T. Fu, J. M. Wu and D. M. Liu (Hsinchu, Taiwan)

Kinetics of tensile deformation in a precipitation-hardened aluminium alloy 97
H. D. Chandler and J. N. Gortzen (Johannesburg, South Africa)

Delamination of beams under transverse shear and bending. 103
T. J. Lu, Z. C. Xia and J. W. Hutchinson (Cambridge, MA, USA)

Triple junctions at the mesoscopic, microscopic and nanoscopic scales 113
L. Priester and D. P. Yu (Orsay, France)

On the blocking effect of grain boundaries on small crystallographic fatigue crack growth. 121
Y. H Zhang and L. Edwards (Milton Keynes, UK)

Transmission electron microscopy analysis of the early stages of damage in a γ/γ' nickel-based alloy under low cycle fatigue . . . 133
C. Monier, C. Bertrand, J. P. Dallas, M. F. Trichet, M. Cornet (Vitry-sur-Seine, France) and P. Veyssiere (Châtillon, France)

Some studies on the incremental step (fatigue) test 141
S. G. S. Raman and K. A. Padmanabhan (Madras, India)

Microstructure of a nickel-based superalloy after creep in [011] orientation at 1173 K 147
T. Kuttner and M. Feller-Kniepmeier (Berlin, Germany)

Effect of reinforcement architecture on mechanical properties of a short fibre/magnesium RZ5 MMC manufactured by preform infiltration. 153
D. J. Towle and C. M. Friend (Swindon, UK)

Limits of conventional micromechanical analysis of interface properties in glass–epoxy model composites 159
P. Feillard (Châtillon, France), D. Rouby (Villeurbanne, France), G. Desarmot and J. P. Favre (Châtillon, France)

A comparative study of superplasticity and cavitation in mechanically-alloyed IN9021 and a SiC_p/IN9021 composite 167
K. Higashi (Osaka, Japan), T. G. Nieh and J. Wadsworth (Livermore, CA, USA)

On newtonian viscoplastic dislocation creep and the effect of the Peierls stress 175
J. N. Wang and T. Shimamoto (Tokyo, Japan)

CONTENTS (*continued*)

Phase transformations and recrystallization in Ni–33at.%Cr alloy. 185
J. Krejčí and L. Karmazin (Brno, Czech Republic)

A micromechanical solidification heat transfer in one dimensional Al–Al_2O_3 composite and its consequence on microstructure evolution 193
C. G. Kang (Pusan, South Korea), S. Ray (Roorkee, India) and P. K. Rohatgi (Milwaukee, WI, USA)

Properties of SiC-fibre reinforced titanium alloys processed by fibre coating and hot isostatic pressing 201
R. Leucht and H. J. Dudek (Köln, Germany)

A re-evaluation of inverse segregation in the Al(rich)–Cu system 211
J. R. Cahoon (Winnipeg, Man., Canada)

Cracking characteristics of A516 steel weldment in H_2S containing environments 219
H. H. Huang, W. T. Tsai and J. T. Lee (Tainan, Taiwan)

Crack-free hard surface produced by laser nitriding of commercial purity titanium 229
S. Mridha and T. N. Baker (Glasgow, UK)

A new model of the pest-like disintegration of intermetallics due to intergranular oxidation. 241
A. Katsman, L. Levin and T. Werber (Haifa, Israel)

Thermodynamic calculation of chemical driving force for complex carbonitrides in multicomponent microalloyed steels. 247
X. Liu, J. K. Solberg, R. Gjengedal and A. O. Kluken (Trondheim-NTH, Norway)

Explosive welding of a near-equiatomic nickel–titanium alloy to low-carbon steel. 251
C. A. Zimmerly, O. T. Inal (Socorro, NM, USA) and R. H. Richman (Mountain View, CA, USA)

Recrystallization mechanisms in a Cu–Cr–Zr alloy with a bimodal distribution of particles 255
M. A. Morris, M. Leboeuf and D. G. Morris (Neuchâtel, Switzerland)

Macroscopic and microscopic phenomena of nickel/titanium "shape memory" bimetallic strips fabricated by explosive cladding and rolling. 267
A. G. Mamalis, A. Szalay, N. M. Vaxevanidis and D. I. Pantelis (Athens, Greece)

Properties of semisolid aluminium matrix composites 277
C. J. Quaak and W. H. Kool (Delft, Netherlands)

Observations on the microstructure and performance of an Al–Ti–C grain-refining master alloy 283
C. D. Mayes (Liverpool, UK), D. G. McCartney (Nottingham, UK) and G. J. Tatlock (Liverpool, UK)

Shape memory TiNi synthesis from elemental powders 291
J. C. Hey and A. P. Jardine (Stony Brook, NY, USA)

Investigation of the austenite–bainite transformation in gray iron using real time neutron transmission 301
K. Meggers, H. G. Priesmeyer (Kiel, Germany), W. J. Trela (Los Alamos, NM, USA) and M. Dahms (Geesthacht, Germany)

Brazing of titanium-based alloys with amorphous 25wt.%Ti–25wt.%Zr–50wt.%Cu filler metal. 305
O. Botstein (Haifa, Israel) and A. Rabinkin (Parsippany, NJ, USA)

Elastic constant degradation from microcracking in ceramic–ceramic composites cycled by slow thermal loading 317
A. Sinha (Rochester, MN, USA), K. Kokini and K. J. Bowman (West Lafayette, IN, USA)

Microstructure of zirconia–(MnZn ferrite) composites 327
Y. C. Lin, D. Gan and P. Shen (Kaohsiung, Taiwan)

Surface modification and coating of powders by ion beam techniques. 335
W. Ensinger and H. R. Müller (Heidelberg, Germany)

Combustion-synthesized β'-SiAlON reinforced with SiC monofilaments 341
C. M. Huang, Y. Xu, D. Zhu and W. M. Kriven (Urbana, IL, USA)

Fabrication of Al_2O_3 fiber preform with γ-Al_2O_3 powder binder for 6061 alloy matrix composites 353
K. Suganuma and K. Nagatomo (Kanagawa, Japan)
